Independent Claims 1 & 7 are allowable over the Prior Art of Record since the cited references, in particular, Comeau et al. (US 6,667,842 B2), taken alone or in combination do not teach or suggest: *the tunnel valve device having a device resistance RT corresponding to a predetermined resistance-area (RA) product, and a shunt resistance Rs connected in parallel across the tunnel valve device, a value of the shunt resistance being based on the parallel combination of RT and Rs substantially equaling a predetermined selected value of resistance, wherein the shunt resistance Rs is located on a substrate/slider for the read head.*

Independent Claims 13 & 17 are allowable over the Prior Art of Record since the cited references, in particular, Comeau et al. (US 6,667,842 B2), taken alone or in combination do not teach or suggest: *the tunnel valve device having a device resistance R_T corresponding to a predetermined resistance-area (RA) product; and a shunt resistance Rs connected in parallel across the tunnel valve device, a value of the shunt resistance being based on the parallel combination of R_T and Rs substantially equaling a predetermined selected value of resistance, wherein the shunt resistance Rs is located at an arm electronics module associated with the read head.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
